Replacement of Water Trap Element – Series 2 & 3 Maximizer

Part #S2-3-WTE

- Release pressure by turning the air valve to off position (vertical)
- Vent air our by pushing button on automatic water trap
- Use 3mm Allan wrench (supplied with kit) to remove the 4 screws on top of the water trap
- Make sure to support the bottom while removing the screws
- Trap then comes out – note the hole is at the top of the filter.
- Remove the filter
- Remove the O Ring
- Remove seal
- From kit supplied insert replacement O-Ring, seal and filter.
- Re assemble water trap by tightening all 4 screws.
- Turn air back on
